

VSAT Ku Band transceivers

VSAT Transceiver Ku-Band CODAN 5900

VSAT CODAN 5900 series Ku Band transceivers offer a wide range of distinctive advantages and enhanced features for satellite communications systems based in remote or challenging geographic regions. Available in all common Ku-Band operating frequencies and 70 or 140 MHz IF configurations-and a range of power outputs-the 5900 provides industry leading technical performance.

CODAN 5900 **High Power** **VSAT Ku-Band** **Transceivers**

VSAT 40 W
CODAN
transceiver
system for
applications
supporting high
power single or
multicarrier
services. This
product comprises
common modules
and features of
the standard
CODAN 5900
series VSAT
transceiver
system.

CODAN VSAT **Redundancy** **Switching** **System**

A range of 1:1
hub-mounting
redundancy
systems is
available for
CODAN 5700
series VSAT
C-Band and
CODAN 5900
series VSAT
Ku-Band
transceivers and
high power SSPA.
CODAN VSAT
satellite
transceivers have
been setting
industry standards
for performance
and reliability

since the early
1990's. However,
there are still
critical
applications
where 1:1
redundancy
protection is
required.
